PROFILE SUMMARY

Motivated and detail-focused beginner frontend developer with hands-on experience building responsive and interactive web applications using HTML, CSS, JavaScript, React, and Tailwind CSS. Comfortable with Git/GitHub for version control and animation libraries like GSAP for dynamic UI effects. Projects include EMS, UFC Store, and a Spotify Clone—demonstrating strong fundamentals in modern frontend practices. Eager to contribute to a collaborative team environment—whether in start-ups or established companies—where clean design, performance, and user experience are valued.

PROFESSIONAL EXPERIENCE

Pierian Services Pvt Ltd | Technical Associate | APR 2022 – MAR 2024

• Collaborated with cross-functional teams to maintain accuracy in digital reporting tools like PVMS and GALC, enhancing communication between production and IT.

• Monitored and ensured smooth operation of production activities across multiple automotive shops, using company-built platforms like PVMS (Plant Visualize Management System) and GALC (Global Assembly Line Control).

• Regularly updated structured production reports using Excel, aligning with best practices in data handling and version control.

• Contributed to continuous improvement (Kaizen) initiatives by documenting processes and participating in team-based problem-solving efforts.

PROJECTS

UFC Store – [Personal] [[View Code](#)]

- E-commerce-style app for browsing, adding, and removing UFC shorts.
- **Tech Stack:** HTML, CSS, JavaScript, GSAP

Employee Management System (EMS) – [Personal] [[View Code](#)]

- A task management app where admins assign tasks to team members, visible upon login.
- **Tech Stack:** React, Tailwind CSS
